## **DETAILED ACTION**

### ***Allowable Subject Matter***

#### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 03/11/2003 and 06/04/2003. It is noted, however, that applicant has not filed a certified copy of the 2003-158927 and 2003-065591 application as required by 35 U.S.C. 119(b).

2. Claims 61-67 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The examiner notes that that Applicant Remark's presented on 09/07/2011 are found persuasive in overcoming the prior of record.

The examiner notes applicant has provided analysis of independent claim 61 and in similar way the same analysis extends to independent claims 66 and 67 which contain similar/related features, and how these features differ over the prior art of record (see Applicant's Remarks). The examiner notes the following limitations for each independent claim where not found to be taught in the prior art of record:

Claim 61

A recording apparatus for recording an encrypted content onto a recording medium storing first media key data and a first encrypted content, the first media key data including a plurality of first encrypted media keys each generated by encrypting one first media key using a corresponding device key of a plurality of first device keys, the first encrypted content being generated by encrypting a content using a first media key, the recording apparatus comprising:

a device key storing unit storing a device key assigned to the recording apparatus;

a storing unit storing second media key data including a plurality of second encrypted media keys each generated by encrypting one second media key using a corresponding device key of a plurality of second device keys;

a comparing unit operable to **compare the first media key data stored in the recording medium with the second media key data stored in the storing unit, so as to judge which of the first media key data and the second media key data is newer;**

**a content decrypting unit operable to, when the comparing unit judges that the second media key data is newer than the first media key data and when the first encrypted content has been stored in the recording medium, obtain the one first media key from the first media key data using a corresponding device key of the plurality of first device keys, and decrypt the first encrypted content stored in**

**the recording medium using the obtained one first media key, so as to generate a content;**

**a content encrypting unit operable to, when the comparing unit judges that the second media key data is newer than the first media key data, and continuously after the content decrypting unit generates the content, obtain the one second media key from the second media key data using a corresponding device key of the plurality of second device keys, and encrypt the content generated by the content decrypting unit using the obtained one second media key, so as to generate a second encrypted content; and**

**a deleting and writing unit operable to delete the first media key data and the first encrypted content from the recording medium, and write the second media key data and the second encrypted content generated by the content encrypting unit to the recording medium,**

**wherein one media key data is stored in the recording medium and two or more pieces of media key data are not stored in the recording medium.**

Therefore, examiner notes based on the noted novel limitations above in combination with the other limitations within the independent claims and the applicant's arguments presented on 09/07/2011, the examiner finds these claims to be allowable.

Dependent claims are allowable by virtue of their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
